Waterway:

Alloway Creek

Location:

Along State Route 49, in Quinton Township, Salem County,

New Jersey

Ms. Jo Ann Szczech New Jersey Department of Transportation 1035 Parkway Avenue, CN 600 Trenton, New Jersey 08625-0600

Dear Ms. Szczech:

10 and 404)

This is in regard to your proposal to replace the existing bridge at the site.

Under current Federal regulations, a Department of the Army permit is required for work or structures in navigable waters of the United States and/or the discharge of dredged or fill material into waters of the United States including adjacent and isolated wetlands. Based upon our review of the information you have provided, it has been determined that the proposed work is approved by the existing Department of the Army nationwide permit (NWP) described below, provided the work is conducted in compliance with the general and special conditions specified in this letter.

Nationwide Permit 23. Approved Categorical Exclusions: Activities undertaken, assisted, authorized, regulated, funded, or financed, in whole or in part, by another Federal agency or department where that agency or department has determined, pursuant to the Council on Environmental Quality Regulation for Implementing the Procedural Provisions of the National Environmental Policy Act (40 CFR part 1500 et seq.), that the activity, work, or discharge is categorically excluded from environmental documentation because it is included within a category of actions which neither individually nor cumulatively have a significant effect on the human environment, and the Office of the Chief of Engineers (ATTN: CECW-OR) has been furnished notice of the agency's or department's application for the categorical exclusion and concurs with that determination. Prior to approval for purposes of this NWP of any agency's categorical exclusions, the Chief of Engineers will solicit public comment. In addressing these comments, the Chief of Engineers may require certain conditions for authorization of an agency's categorical exclusions under this NWP. (Sections

This authorization does not affect your responsibility to obtain any other Federal, State or local approval(s) required by law for the proposed work before beginning work.

The enclosed table (Enclosure 1) identifies those NWPs which require a preconstruction

notification (PCN) to the Corps of Engineers, those which have been regionally conditioned by the Division Engineer, and those which have been denied 401 Water Quality Certification (WQC) and/or Coastal Zone Management (CZM) consistency by the State. It is noted that CZM consistency from the State is only required for those activities in or affecting a State's coastal zone. Additionally, some of the NWPs do not involve a discharge of dredged or fill material, and as such, do not require a 401 WQC. For those NWPs not requiring a 401 WQC, the appropriate rows and columns have been identified with the term "NA". If the State has denied the required WQC and/or not concurred with the Corps' CZM consistency determination, the NWP authorization is considered denied without prejudice until an

individual project specific WQC and/or CZM approval is obtained. This approval must be obtained in order for the activity to be authorized under the NWP and a copy provided to this office before work begins. Any project specific conditions required by the State for the WQC and/or CZM approval will automatically become part of the NWP authorization.

You should carefully note that this NWP authorization is based upon your agreement to comply with the terms and conditions of this NWP (Enclosure 2), including any and all attached project specific special conditions listed below. Initiation of any authorized work shall constitute your agreement to comply with all of the NWP's conditions. You should also note that the authorized work may be subject to periodic inspections by a representative of this office.

PROJECT SPECIFIC SPECIAL CONDITIONS:

- 1. All work performed in association with the above noted project shall be conducted in accordance with the project plans entitled "...Plans of Route 49 (1953) Section 3J & 4C...", prepared by the New Jersey Department of Transportation, dated February 2002, unrevised, sheets 1 through 25 of 25. The project plans provide for the removal of an existing swing
- bridge and replace it with a modern structure. Approximately 0.1 acres of open water and wetlands will be permanently impacted by the project and approximately 0.1 acres of areas of Federal jurisdiction will be impacted by temporary work, including the installation of a temporary structure at the site. The stated purpose of the project is to provide for the replacement of the existing deteriorated structure.
- 2. Construction activities shall not result in the disturbance or alteration of greater than 0.2 acre of waters of the United States.
- 3. Any deviation in construction methodology or project design from that shown on the above noted drawings must be approved by this office, in writing, prior to performance of the work. All modifications to the above noted project plans shall be approved, in writing, by this office. No work shall be performed prior to written approval of this office.

This office shall be notified at least 10 days prior to the commencement of authorized

work by completing and signing the enclosed Notification/ Certification of Work Commencement Form (Enclosure 3). This office shall also be notified within 10 days of the completion of the authorized work by completing and signing the enclosed Notification/Certification of Work Completion/Compliance Form (Enclosure 4). All notifications required by this condition shall be in writing and shall be transmitted to this

office by registered mail. Oral notifications are not acceptable. Similar notification is required each time maintenance work is to be done under the terms of this Corps of

require the removal, relocation, or other alteration, of the structure or work herein authorized, or if, in the opinion of the Secretary of the Army or his authorized representative, said structure or work shall cause unreasonable obstruction to the free navigation of the navigable waters, the permittee will be required, upon due notice from the Corps of Engineers, to remove, relocate, or alter the structural work or obstructions caused thereby, without expense to the United States. No claim shall be made against the United States on account of any such removal or alteration.

Dewatering structures to be placed at the site shall be installed prior to the deposition of

The permittee understands and agrees that, if future operations by the United States

- 7. Efforts shall be made to keep construction debris from entering the waterway or wetland. Debris in the waterway or wetland shall be removed immediately.
- 8. No dredging is authorized by this permit.

Engineers permit.

any fill material at the site.

6.

9.

and other pollutants, and shall contain no broken asphalt.10. That the permittee shall perform the work authorized herein in strict accordance with the New Jersey State Standards for Soil Erosion and Sediment Control.

The fill material shall be free of oil and grease, debris, wood, general refuse, plaster,

- 11. All in-water work is prohibited from April 1 through May 15 and between September 1 through November 1 of any year, to ensure that impacts to fishery resources at the site are
- through November 1 of any year, to ensure that impacts to fishery resources at the site are minimal.

 12. The permittee shall comply with the terms and conditions of the Memorandum of

Agreement (MOA) developed for the project. It should be noted that the Federal Highway

Administration will be the lead agency for all issues regarding this MOA.

13. The permittee shall submit to this office for review, within 30 days of the date of this permit verification letter, a mitigation plan to compensate for the 0.1 acres of wetlands that will be permanently impacted by the project. No work shall be performed at the site, within areas of Federal jurisdiction, until this office sends written confirmation of the acceptance of the mitigation plan.

You are advised that this verification of NWP authorization is valid for two (2) years from the date of this letter, unless the NWP authorization is modified, suspended, or revoked. In the event that the NWP authorization is reissued and/or modified during that time period, this two-year expiration date will remain valid, provided the activity complies with any subsequent reissuance and/or modification of the NWP authorization.

The existing NWPs will expire on March 19, 2007. Activities which have commenced (i.e., are under construction) or are under contract to commence in reliance upon a NWP, will remain authorized provided the activity is completed within 12 months of the date of the NWP's expiration, modification, or revocation, unless discretionary authority has been exercised on a case-by-case basis to modify, suspend, or revoke the authorization. As such, any work to be completed beyond this date in reliance upon this existing NWP must be completed by March 18, 2008. Activities completed under the authorization of a NWP which was in effect at the time the activity was completed, continue to be authorized by that NWP. Accordingly, it is incumbent upon you to remain informed of any changes to the NWP authorization(s).

Also enclosed is a pre-addressed postal card (Enclosure 5) soliciting your comments on the processing of your application. Any comments, positive or otherwise, on the procedures, timeliness, fairness, etc., may be made on this card. If you should have any questions regarding this matter, please contact Mr. Lawrence M. Slavitter at (215) 656-6734 or write to the above address.

Sincerely,

Frank J. Cianfrani
Chief, Regulatory Branch
